

How to ensure “good” data? Quality assurance by research data repositories

Open Repositories 2021, 10 June 2021

Authors:

⁶DataCite - International Data Citation Initiative e.V.

Outline

1. re3data and re3data COREF
2. Research data quality as a research topic in re3data COREF
3. Survey: Research data quality management at research data repositories (preliminary)
4. Outlook and conclusion

re3data mission

- [Global registry](#) of research data repositories (2,600+ repositories registered to date)
- Covers [all academic disciplines](#)
- Presents repositories and portals for the [permanent storage](#) of and [access](#) to research data sets to researchers, funding bodies, publishers and scholarly institutions.
- Promotes a culture of [sharing, increased access and better visibility](#) of research data
- Service launched in 2012 (funded by German Research Foundation)

re3data metadata

41 properties on

- General information
- Responsibilities
- Policies
- Legal aspects
- Technical standards
- Quality standards
- Icon system

Repository details

PANGAEA

General	Institutions	Terms	Standards
Name of repository	PANGAEA		
Additional name(s)	Data Publisher for Earth and Environmental Science		
Repository URL	https://www.pangaea.de/		
Subject(s)	Oceanography Geology and Palaeontology Geophysics Geochemistry, Mineralogy and Crystallography Biology Atmospheric Science and Oceanography Geosciences (including Geography) Natural Sciences Geology and Palaeontology Geophysics and Geodesy Geochemistry, Mineralogy and Crystallography Life Sciences		
Description	The information system PANGAEA is operated as an Open Access library aimed at archiving, publishing and distributing georeferenced data from earth system research. The system guarantees long-term availability of its content through a commitment of the operating institutions.		
Contact	https://www.pangaea.de/contact/		
Contact type(s)	Source code Standard office documents Images Plain text Archived data Audiovisual data		
Certificates and Standards	CoreTrustSeal		
Keyword(s)	lithosphere paleontology atmosphere ecology biosphere land surface cryosphere fisheries agriculture earth science environmental science biology		
Persistent identifier(s) of the repository	FAIRsharing_doi:10.25504/FAIRsharing.6yww6cp		
Repository type(s)	disciplinary		
Mission statement for designated community	https://www.pangaea.de/about/		
Research data repository language(s)	eng		
Data and/or service provider	dataProvider

re3data COREF - objective

Increasing re3data's value for all stakeholders, further establishing the service as a tool for finding and referencing research data repositories.

Key Facts

- Starting date - 01/01/2020
- Duration - 36 months
- Funded by the German Research Foundation

Revising the re3data Metadata Schema

Version 3.1

ca. 150 comments in the RFC - Thank you!

Two major changes:

- revision of `r3d:certificate`
- new property `r3d:profile`

Next steps:

- Version 4.0
- mapping to schema.org
- RDF implementation

Updating the re3data service model

Identify **relevant use cases and requirements**
(survey and workshops with 21 stakeholders)

Use cases include:

- search and discovery of research data repositories
- reusing re3data metadata
- administrating re3data metadata
- referencing research data repositories

Making research data quality assurance visible

making **efforts of ensuring data quality at research data repositories** visible in re3data

- multi-method empirical research into data quality and data quality assurance practices
- revising metadata element [r3d:qualityManagement](#) based on the findings

Research design

Data journal guidelines

Quality definitions
Repository recommendations

Metadata collection on data journal characteristics of 142 data journals

Qualitative content analysis of journal guidelines (author guidelines, peer review guidelines, etc)

Core Trust Seal documents

Quality definitions
Quality management activities at repositories

Qualitative content analysis of 99 self-description documents from Core Trust Seal certification 2017–2019

RDR indexed in re3data

Quality management in practice
Applied quality criteria

Online survey conducted from 18 May until 14 June 2021

Survey

Questionnaire

- repository characteristics, formal assessment of data quality, data curation, data review, data evaluation by repository users, and indicators of data quality ([Overview](#))
- 24 questions

Sampling

- Mailing list of 1897 re3data repository contacts

Field phase

- Individualized online survey with Lime Survey
- Started 18 May, deadline extended until 14 June

Survey

Response rate (preliminary)

- More than 300 repositories participated so far

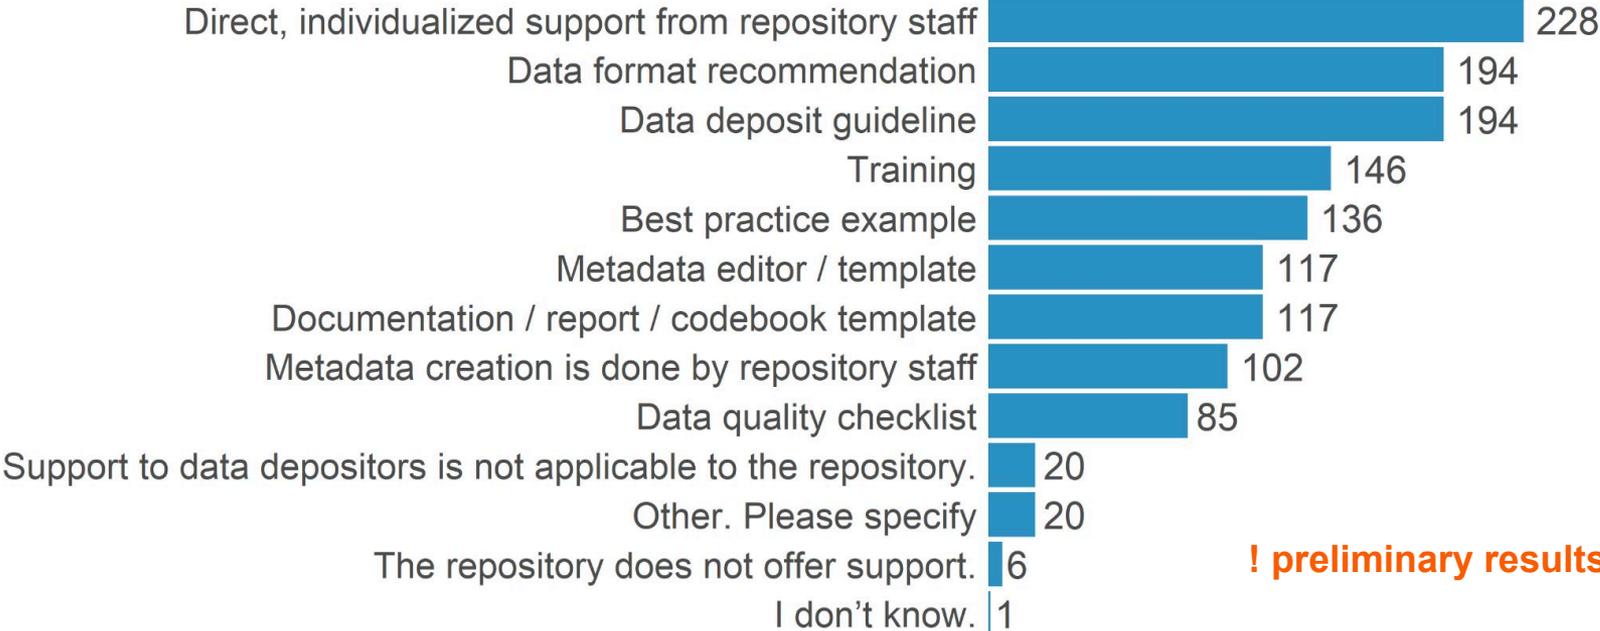

Data analysis

- Data will be matched with re3data metadata information
- Results will be shared with the community, without references to single repositories

Survey: Data quality management at research data repositories (preliminary)

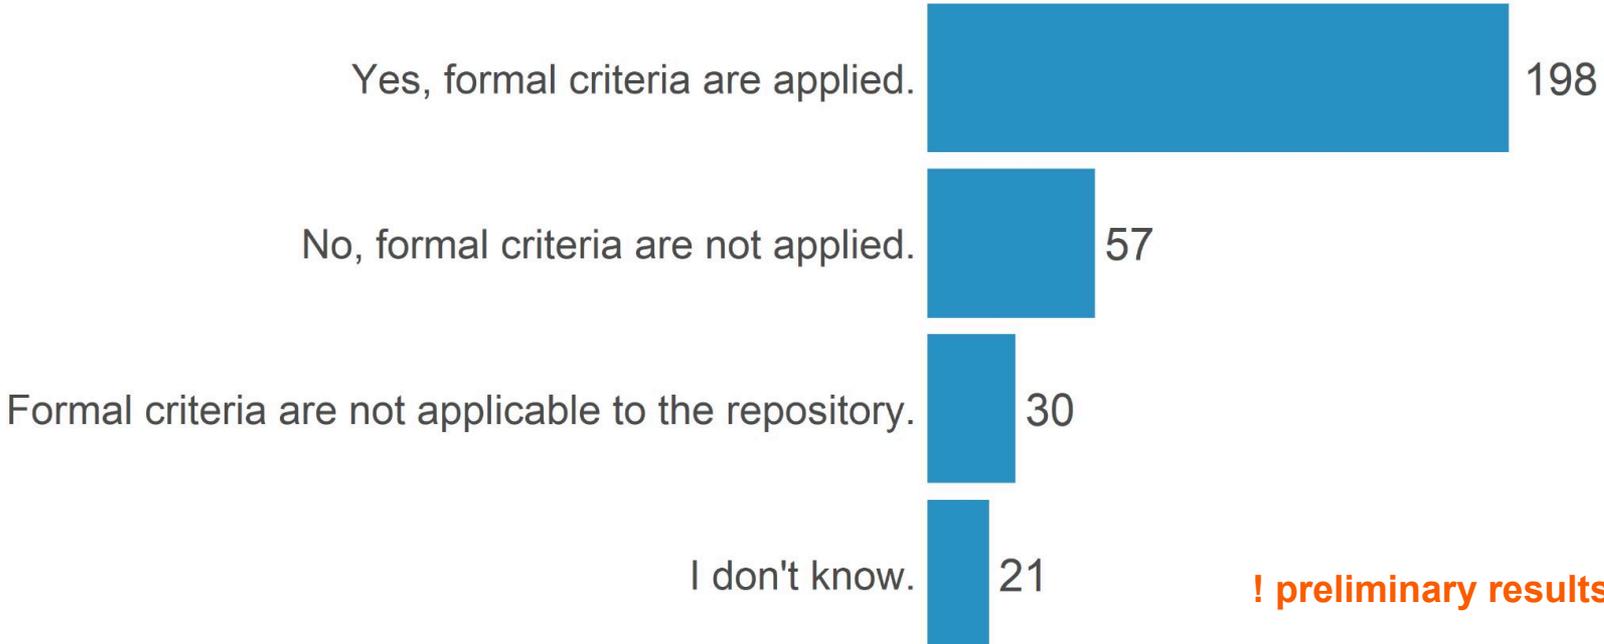

What types of support are offered to data depositors?
Choose all that apply.

! preliminary results !

1366 responses from 306 repositories

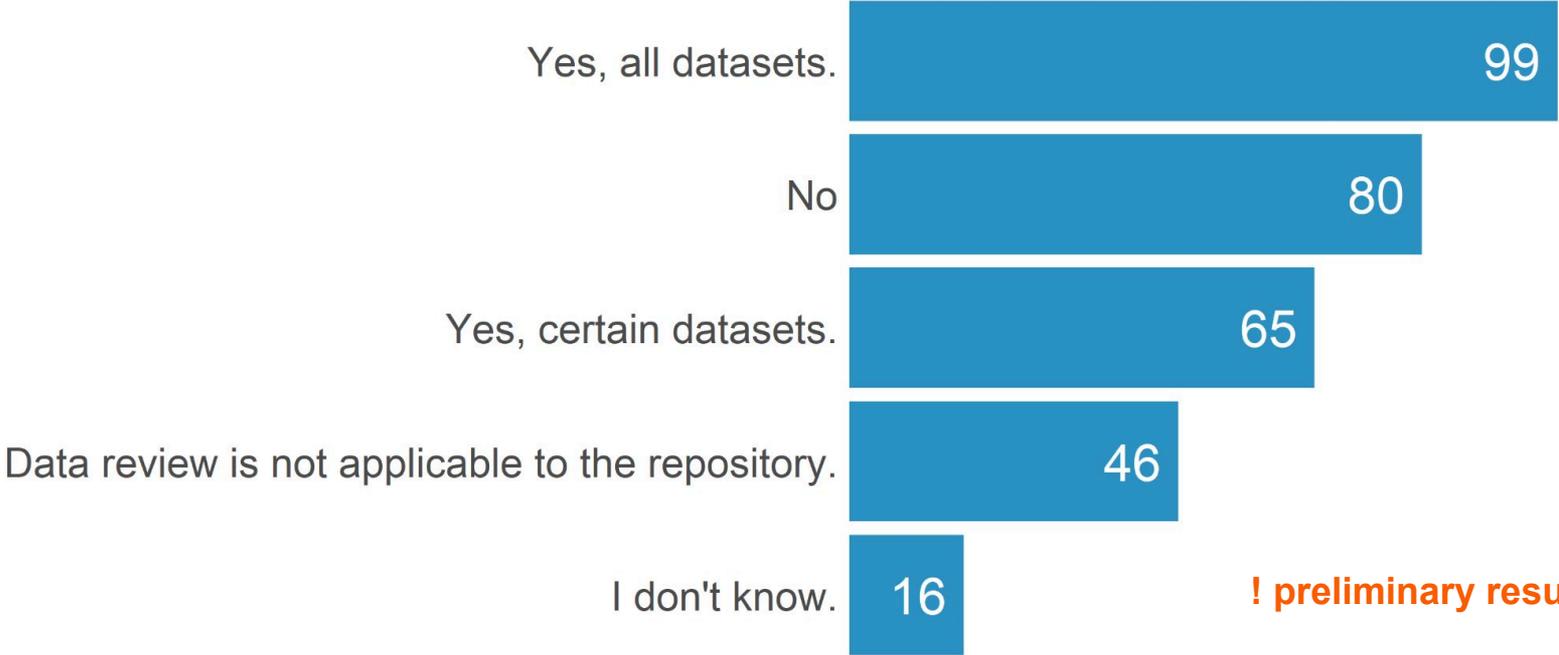

Are formal criteria applied to data before publication?

! preliminary results !

306 responses from 306 repositories

Are data reviewed beyond the application of formal criteria?

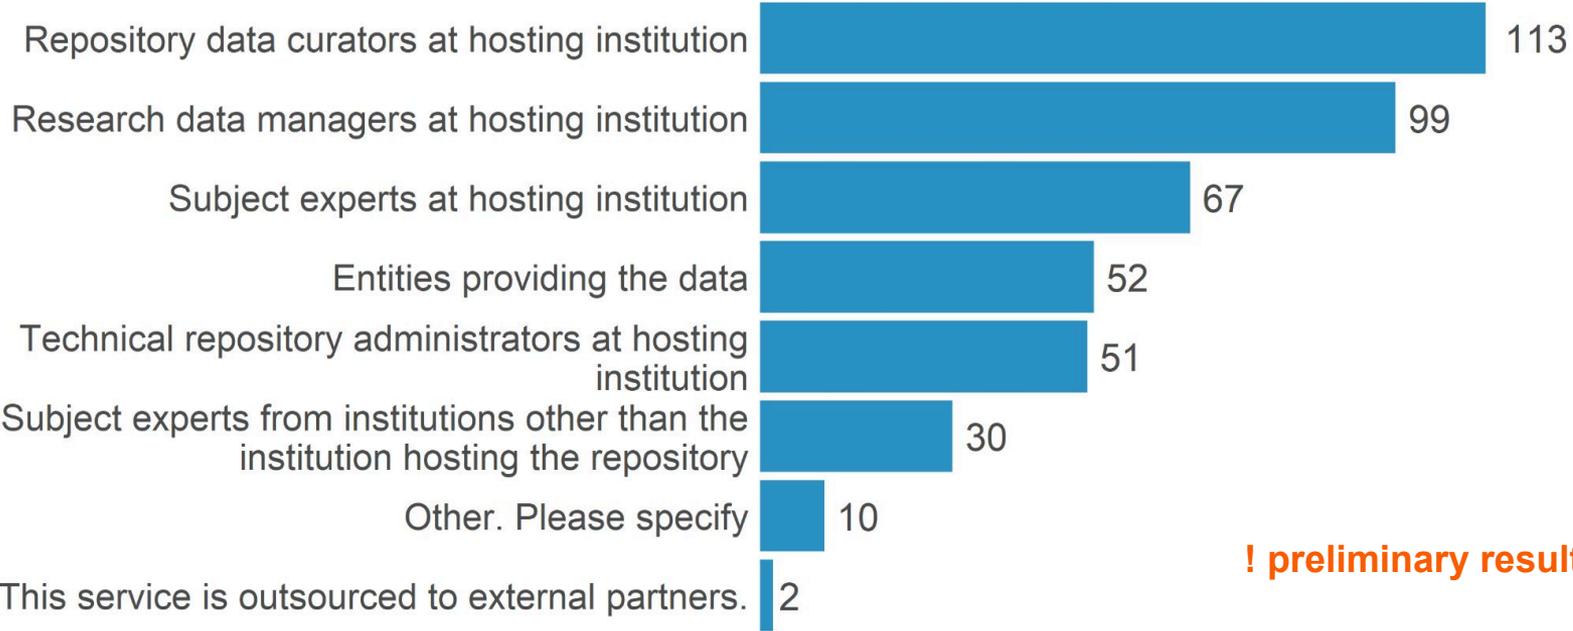

! preliminary results !

306 responses from 306 repositories

Survey: Data quality management at research data repositories (preliminary)

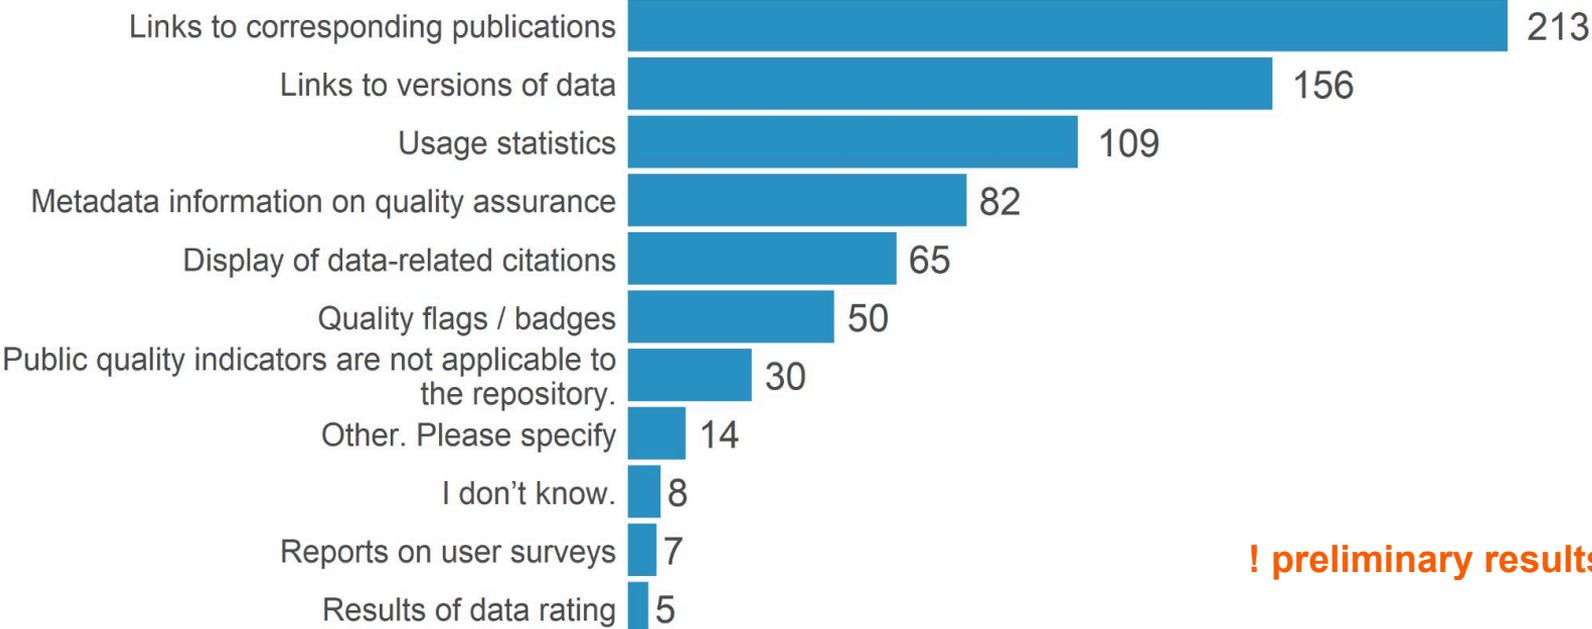

Who is responsible for data review? Choose all that apply.
(Please note that the roles listed can overlap.)

! preliminary results !

424 responses from 164 repositories

What types of quality indicators are made public to data users?
Choose all that apply.

! preliminary results !

739 responses from 306 repositories

Outlook and conclusion

- RDR can play a significant role in research data quality assurance
- Visibility of quality management needs to be increased
- As complex as the concept of quality is, so are the applied processes of quality management at repositories
- re3data COREF plans to propose “soft” description/vocabulary for a more sophisticated quality management property in the next version of the metadata schema (4.0)
- re3data COREF plans follow-up activities

Thank You!
